PROFESSIONAL SUMMARY

Full Stack Developer with expertise in MERN, Next.js, and secure authentication, delivering scalable, real-time applications driven by strong algorithmic foundations.

EDUCATION

Bachelor of Technology (Artificial intelligence)   2024 - 2028
Newton School of Technology Rishihood University   Grade: 7.2/10.0

Intermediate (Class XII)   2022 - 2023
New Bombay City School   Grade: 78.0%

Matriculation (Class X)   2020 - 2021
Podar International School   Grade: 91.0%

PROJECTS

Job Portal – Full Stack Web Application ([Github](#)) ([Demo](#))   November 2025

- Created a unified job platform to solve the communication gap between students and recruiters, enabling users to easily search for jobs, track applications, and manage the entire hiring process in one organized dashboard.
- Developed the system using Next.js, Node.js, and Prisma, where I managed complex real-time data flow to build an instant messaging feature via Socket.io and implemented secure authentication to protect sensitive user information.
- Optimized the website to achieve a 99 Performance and 100 SEO score, ensuring the page loads in just 0.8 seconds (LCP) with zero delay (0ms TBT) for a completely smooth and fast user experience.

EMWare.Ai ([Github](#)) ([Demo](#))   June 2025

- Solved the time-consuming process of manual trip planning by building an intelligent platform that instantly generates personalized travel itineraries based on the user's specific budget, interests, and travel dates.
- Built using React.js and Google Gemini AI, where I integrated Google Places and Pexels APIs to fix manual entry errors by 60% and improve the user interface with high-quality, real-time destination images.
- Achieved a 99 Performance score with a fast 0.9-second load time (LCP) and minimal delay (80ms TBT) by optimizing state management and implementing smooth GSAP animations for a responsive experience.

SKILLS

Computer Languages: SQL, JavaScript, TypeScript, Python
Data Tools: NumPy
Software Packages: MongoDB, MySQL, Node.js, Redux, React, Prisma ORM, Tailwind CSS, Next JS, Express JS
Additional Courses: Data Structure
Others: OAuth 2.0, GitHub Actions, Postman, Firebase, Git and Github
